## perfectpur flora

### What is perfectpur flora ?

**perfectpur flora** is a disinfectant specially developed for horticulture and plant cultivation. It is a spray solution with bactericidal, levurocidal and virucidal efficacy.

It is also approved as a plant strengthener for cut flowers (after cutting).

We expressly point out that it is **not a plant protection product**.

### Areas of application:

**perfectpur flora** perfectpur flora is suitable for use as part of an HACCP concept under Regulation 853/2004 on food hygiene: for the disinfection of facilities and pipelines used in connection with the production, transport and storage of food or feed (including drinking water) for humans and animals.

**perfectpur flora** perfectpur flora can be used in horticulture and plant cultivation:

- for the disinfection of tools and equipment in plant care
- on surfaces of objects, walls, etc.
- for containers
- for crockery, cutlery, ...
- for the disinfection of irrigation water
  - vegetable gardens
  - fruit trees
  - potted flowers / plants
  - houseplants
  - plants of all kinds
- cut flower water (plant strengthener)

### Application and dosage:

#### For irrigation water:

mix approx. 10–15 ml **perfectpur flora** with 1 litre of water, done!

#### For cut flowers:

mix approx. 10 ml perfectpur flora with 500 ml of water (please shorten the flower stems slightly beforehand). This may extend their vase life.

#### In the garden:

preferably water at dusk (not in direct sunlight).

## Available container sizes:
